how can the european union meet its binding 20 renewable energy target in final energy

consumption by the year 2020 which sources offer the best prospects for realizing this goal these are the questions answered by this key book which analyses the current situation of renewable energy in europe examines the latest technological financial and economic developments and outlines ways in which the renewable energy market can be developed the book is divided into sections examining the integration of renewable energy electricity heating and cooling as well as biofuels all the main technologies are covered with exploration of benefits and applications costs and prices markets and installed capacity policy instruments key countries and success stories targets and long term potential this will be essential reading for policy decision makers at all levels and to all those involved in the development of the renewable energy industry

in a multipolar world with growing demand for energy not least by emerging powers such as brazil india china or south africa bics questions of eu external energy governance would at first hand appear to be a high priority yet reality tells a different story the eu s geographical focus remains on adjacent countries in the european neighbourhood and on issues related to energy security despite being strategic partners and engaging in energy dialogues it seems that the eu is lacking strategic vision and is not perceived as a major actor in energy cooperation with the bics thus political momentum for energy cooperation and joint governance of scarce resources is vanishing resulting from three years of international interdisciplinary research cooperation among academics and practitioners in europe and the bics countries within a project funded by the volkswagen foundation this volume addresses one of the greatest global challenges specific focus lies on the bilateral energy dialogues and strategic partnerships between the eu and emerging powers regarding bilateral inter and transnational energy cooperation furthermore the analysis provides policy recommendations in order to tap the full potential of energy cooperation between the eu and brazil india china and south africa

this study traces the activities of the european commission in the natural gas sector from 1990 to 2016 by concentrating on market liberalisation and infrastructure development as the main pillars of the european gas security architecture by building on previous literature the commission s policymaking is analysed along its formal and informal powers in different energy security environments in order to get a better understanding of the european energy market context the reader is introduced into the historical development of the european energy policy in chapter 2 and the literature on

the european union policymaking in chapter 3 the analysis of the commission s activities in the liberalisation chapter 4 and infrastructure chapter 5 sectors suggests that the commission was able to effectively utilise networked governance during times when the demand for coordinated energy policies was low this book will be of particular interest to those in the field of energy policies as well as eu policymaking

the book adopts an innovative analytical approach to agenda setting by not only presenting successful cases in which energy issues were addressed by means of public policy but by also analyzing failed attempts to make issues part of the european policy agenda another outstanding feature of the book is its use of the latest empirical data on a broad range of energy issues when are energy issues likely to find their way to the agenda of european policymakers this is the key research question guiding this collection of empirical studies which will shed light on both successful and unsuccessful attempts to include energy issues in the european agenda the multi level political system of the european union represents a particularly fruitful setting for addressing this question due to the multiple institutional access points it provides for different groups of actors the book has three key benefits first it provides a theory informed analysis of agenda setting processes in general and in the european union in particular second it presents an overview of the most important and emerging dimensions on european energy policy and third it helps to develop a research agenda for future research in the field

this thoroughly revised second edition presents a comprehensive overview of the most important contemporary research in eu energy law and policy the research handbook brings together a diverse array of experts highlighting the multifaceted nature of this continually developing field

scientific essay from the year 2010 in the subject politics international politics topic european union grade a bilkent university course eu policies language english abstract the aim of this paper is to analyze the dynamics at the core of the relation between turkey and the european union eu in terms of energy related issues the prospect of turkey s accession to the eu is one of the most controversial issues affecting the wider european political space this essay would like to shed light on the impact of energy considerations on turkey s process of accession exploring three inter related dimensions

first of all a brief account of the eu's patterns of energy consumption and strategies adopted will be offered secondly the relevance of turkey as energy corridor linking eastern energy resources to western markets will be assessed finally eu member states standpoints on turkey's accession will be investigated trying to isolate the impact of energy driven calculations a liberal intergovernmental approach will spell out patterns of divergence or convergence on turkey's accession evaluating the impact of the energy factor on turkey's eu eventual membership in conclusion this article will show whether or not energy can be considered the determiner for turkey's accession pointing out that the energy card should not be overplayed since the eu's acknowledgement of turkey's energy strategic could not automatically lead to full membership

the dynamics of eu external energy relations examines the behaviour of the european commission in eu external energy relations paying particular attention to the dynamics existing between the commission and the member states it examines the commission as a constrained policy entrepreneur trying to expand its power budget and competences yet frustrated by member states protective of their national sovereignty analysing the commission as agent and the member states as its principals the book proposes a more nuanced examination of behaviour where the agent tries to satisfy its own interests but is still responsive to the preferences of the principals using a wide range of original primary and secondary data the book argues that eu external energy relations reflect the dynamics of the relations between the commission and the member states this book will be of key interest to scholars and students of european union studies and politics eu energy and foreign policy and more broadly to european politics and international relations

this is a new sixteenth edition of the directory of eu information sources it brings together a broad range of information sources comprising not only the various constituent institutions of the european union their personnel publications information websites and representations in europe and the rest of the world but also diplomatic representation in brussels european level trade and professional associations and ngos consultants and lawyers specializing in eu affairs press agencies eu grants and loans programmes and universities offering courses in european integration this is the most comprehensive compilation of contacts and published information on the european union providing access to over 12 500 information sources

the energy sector is one of the pillars of growth competitiveness and development for

modern economies to keep up with the ongoing transformation of the energy sector in europe we need data that is accurate and up to date this publication provides an overview of the most relevant annual energy related statistics for the european union as a whole and for each of its member states

this edited collection focuses on the impact of the changing global distribution of power on the eu s energy policy and ability to project its approach to energy related issues abroad it maps the eu s changing position on global energy the impact of various factors on its energy policy and its relations with russia china the usa and brazil

in a multipolar world with growing demand for energy not least by emerging powers such as brazil india china or south africa bics questions of eu external energy governance would at first hand appear to be a high priority yet reality tells a different story the eu s geographical focus remains on adjacent countries in the european neighbourhood and on issues related to energy security despite being strategic partners and engaging in energy dialogues it seems that the eu is lacking strategic vision and is not perceived as a major actor in energy cooperation with the bics thus political momentum for energy cooperation and joint governance of scarce resources is vanishing resulting from three years of international interdisciplinary research cooperation among academics and practitioners in europe and the bics countries within a project funded by the volkswagen foundation this volume addresses one of the greatest global challenges specific focus lies on the bilateral energy dialogues and strategic partnerships between the eu and emerging powers regarding bilateral inter and transnational energy cooperation furthermore the analysis provides policy recommendations in order to tap the full potential of energy cooperation between the eu and brazil india china and south africa

written by nicholas moussis a former european commission adviser and author of several well known reference works on european issues eu environment and energy policies provides a comprehensive overview of two sectors destined to dominate political discussions over the next few years divided into four chapters each completed by an annex containing full versions of the key legislative texts mentioned therein the 660 page work offers an excellent reference instrument for anyone trying to follow

developments in these fast evolving areas of eu policy

the objective of this study is to analyze the impact of crude oil prices on the eu agricultural sector in an era when the biofuels sector is expanding because of policy initiatives and the desire to find alternative fuel sources to this end first a baseline is set up for the eu ethanol grain and dried distillers grains markets in he next step two different scenarios are run the first scenario incorporates a 10 euros per barrel increase in the u crude oil price with the ethanol import tariffs in place the second scenario incorporates the same shock with the ethanol import tariffs removed in the first scenario higher crude oil prices increase ethanol consumption production and therefore grain prices in the second scenario the impact of trade liberalisation is larger than the impact of the higher crude oil price so grain prices decline in this scenario despite an expansion in ethanol consumption if there were a high enough crude oil price shock which would affect the eu ethanol market more than trade liberalisation the net impact on grain feed and food prices from the crude oil price shock would be mitigated by the increased trade from trade liberalisation the study shows that the impact of energy prices on the eu agricultural sector is increasing with the emergence of the biofuels sector it also illustrates the importance of trade policy in responding to higher crude oil and grain prices
