the authors are to be congratulated on a book which merits usage in the national curriculum international journal of nautical archaeology the raising of the tudor warship mary rose in 1982 has made her one of the most famous ships in history though there is a good deal more to her story than its terminal disaster she served successfully in the royal navy for more than thirty years before sinking for reasons still uncertain during a battle off portsmouth in 1545 there have been many books published about mary rose but this is the only one written largely by those who sailed with her it is based around original documents including all the known despatches written aboard mary rose by the commanding admirals extracts from accounts and other papers illustrate the building equipping and provisioning of the ship although this is primarily a view from the quarter deck there are occasional glimpses of life below the collection concludes with reports of the sinking and of the first attempts to salvage the ship and her ordnance the documents are presented in modern spelling and are set in context through linking narratives technical terms are explained and the principal characters introduced the texts are supplemented by contemporary images and by photographs of the preserved ship and recovered objects a new range of illustrations has been added to this edition published forty years on from the raising of the hull

the raising of the mary rose in 1982 made headline news as an archaeological event it ranked alongside schliemanns excavations at troy or arthur evanss discovery of knossos and so much information has since been gleaned from the wreck and its contents that there is an overwhelming tendency to treat the ship as a time capsule like some tudor burial site but the mary rose is not just an archaeological relic she is a warship that was revolutionary in her time and despite being most famous for her loss in battle a ship that had served her monarch for 34 years almost the length of his reign this book tells the full story of the construction and career of the ship

placing it firmly within the colorful context of tudor politics court life and the developing administration of a permanent navy however it also brings the story down to the present day with chapters on the recovery and the new ideas and information thrown up by the massive program of archaeological work since undertaken written by the development director of the mary rose trust and heavily illustrated from the massive resources of the trust this is a book which will appeal to general reader and specialist alike
